Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

2. The abstract of the disclosure is objected to the abstract does not set forth the nature and gist of the invention.

Correction is required. See MPEP § 608.01(b).

3. Claim 8 is objected to because of the following informalities:

In claim 8, the phrase "capable of" renders claim indefinite since it is positively recited.

Appropriate correction is required.

4. Claim 7 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim *cannot depend from any other multiple dependent claim*. See MPEP § 608.01(n). Accordingly, the claim 7 has not been further treated on the merits.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6,8-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kelly, Jr. (2,743,416).

Kelly discloses all of the claimed invention including a core 18; detection winding 21; and excitation winding 13 and a compensation circuit (note figs. 1-2; col. 3, lines 27-38; lines 48-58; col. 4, lines 12-22).

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly, Jr. in view of Choi et al. (6,411,086).

Kelly discloses a magnetometer as described above except for the magnetometer being formed from a stack of thin layers. The use of stack of thin layers for forming a magnetometer is very well known in the related art. This feature is also taught by Choi (col. 2, lines 1-10; col. 1, lines 54-60).

Consequently, it would have been obvious to one having ordinary skill in the art

at the time the invention was made to make the device of Kelly from thin layers as taught by Choi to reduce the overall size of a system and to detect a magnetic field with greater accuracy since this technology is known for its use.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jay M. Patidar whose telephone number is 571-272-2265. The examiner can normally be reached on M-Thur 7:00-5:30.
